

QTE Manufacturing Solutions

Do it Faster!

Techniques For Using today's Technology to Machine and Inspect Parts Fast.

Seminars-

Wednesday, October 19th 4:30- 5:30PM Room 102

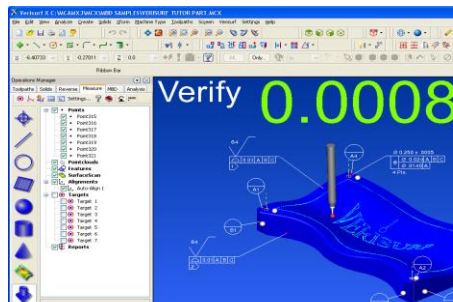

Thursday, October 20th 4:30- 5:30PM Room 102

Booth- 335 and 336

Topic 1-

QTE and Mastercam join forces to show you how to increase profitability through intelligent machining. The two industry leaders come together to provide you with faster machining time and longer tool life! Mastercam unveils new technology designed specifically to run the latest tools.

Topic 2-

QTE and Verisurf join forces to show you how to increase Productivity with Rapid Shop Floor Inspection.

- Rapid three step- Align, Inspect, Report inspection process.
- Model-Based GD&T inspection.
- How to improve efficiency and reduce scrap.
- How to improve quality with a Model-Based Enterprise.

Presenter is Reece Gibson. He has been a Mastercam and Verisurf Applications Engineer for 10 Years. He has a vast amount of industry experience in Aerospace, Production, Live Tooling Lathes, GD&T etc.
