

## Danny Davis

WIDIA Products Group  
Staff Engineer, Product Engineering  
[Danny.davis@widia.com](mailto:Danny.davis@widia.com)

Danny Davis is a staff engineer in WIDIA's product engineering group. In this role, he oversees major projects related to WIDIA's solid carbide endmills and HSS end mills.

He began his career at WIDIA in 1983 as machine operator and quickly became responsible for producing the company's custom Hanita endmills in the Asheboro, NC facility. Throughout his career, he has held various positions within the company including Manufacturing Team Lead and Manager of Customer Solution Engineering for North America.

Mr. Davis has extensive knowledge in designing, costing, programming, and applying Solid Carbide End Mills to meet today's unique customer requirements. Throughout his career he has filed for 15 patents.
