

**APPLICATION FOR AIR SERVICE**

**WICHITA INDUSTRIAL TRADE SHOW**

**OCT 26-28, 2021**

Exhibitors must return the written request for air service in advance. Compressed air service will be provided in the easement behind the booth or from the overhead through a 1/4 - 1/2 - 3/4 disconnect (industrial female) coupler. **Exhibitors are required to furnish the hose(s) from the WITS coupler(s) to their own equipment and must make all connections to their own equipment. WITS personnel will not hook up the air lines to the equipment.**

Exhibitors are encouraged to blow out the hose before hooking to the machine and have air filters and air water traps on their equipment. The air compressor will have a dryer, but the air lines at Century II Expo Hall are not used often and can have moisture and scale.
