

# INFORMATION FOR ELECTRICAL SERVICE 110 volt

Rev 6-18-21

## WICHITA INDUSTRIAL TRADE SHOW

OCT 26-28, 2021

Each booth will have access to ONE 110 v receptacle within 30 ft. of their booth. Each outlet in the receptacle is fused at 20 amps.

These outlets are either on the wall , on posts or in floor boxes. The multiple outlets are to be shared with other Exhibitors. It is suggested to bring a power strip and use extension cords to your booth. The Exhibitor is responsible for bringing their own extension cords and power strips to accommodate their needs. The outlets in the floor can be at the front, middle or in the adjoining booth. It may be behind the booth in the service area.

Go To: [www.witshow.org](http://www.witshow.org) > EXHIBIT > Exhibit Resources > Electric 110 Volt

If you still have questions about the location of the 110 volt outlets, then fill out this form and send it to the WITS office and we will email you a PDF showing the location of Electricity for your booth(s)
