APPLICATION for 208v 3ph and 480v 3ph Electricity

2023 WITS Show – Wichita Industrial Trade Show October 17th – 19th

Century II Expo Hall has 110v, 208v 3-phase 208 single- phase and 480v 3-phase is available. Large machine will start being unloaded and set Thursday Oct 12th and they will be connected if the machine people are there. Exhibitors are NOT allowed to make any electrical connection to the Century II wiring connection boxes. All connections are made by site-authorized electrician and can be requested at the WITS office during set-up. A licensed and authorized electrician at your expense must make the actual connection(s) of any 3-phase sources. An electrical company will be available at the show during set-up and teardown of the booths. Their charge is based on time and material. Please provide your accounts payable contact's name, address and phone number

.

Note: Machines requiring more than 100 amps of 208v may be subject to a surcharge depending on location and wire size. Contact Don Lenhart 316-573-7690 for further discussion.

Company Name :

Contact Person Responsible for Booth Set-up:	Cell Phone Number:

We realize the exhibitors may not know for sure which piece(s) of equipment they will be bringing to the WITS Show. Please estimate what your requirements might be, then revise this form as needed when we get closer to the show. IF THE MACHINE IS NOT USING ITS FULL AMP LOAD, PLEASE ESTIMATE THE NEED. THIS IS IMPORTANT. We need this information to plan the electrical loads. Note: Our 480v service is limited by 100 amp breakers. Our 208v breakers in the floor and on the wall are 100 amp. Anything over 100 amp has to come from overhead.

Booth Number / machine	Amps required			Notes
	208V Single Phase AMPS Needed	208V 3-phase AMPS Needed	480V (100 amp max) 3-phase AMPS Needed
