

Nathan Byman  
Founder and President  
Wolfram Manufacturing  
Austin, Texas

Nathan Byman is the Founder and President of Wolfram Manufacturing, a company committed to advancing the work environment and competitiveness of manufacturing. Nathan has had the opportunity to serve in executive leadership roles focused on manufacturing technology at some of the premier contract manufacturers in the south-central US, and in operations and engineering roles at companies like Wyman Gordan / PCC, and Lockheed Martin. Nathan has a BSME from the University of Texas and an MBA from Rice University. Nathan founded Wolfram to be a production machine shop with a scientific nature that focused on using the best technology available to make a workplace that could be commercially competitive and be an attractive environment for today's workforce. This mission has grown and become more relevant by the day - Wolfram now shares what they do and how they do it with manufacturers across the US.
